

North Coast Watershed Assessment Program

Mattole Watershed Synthesis Report

The mission of the North Coast Watershed Assessment Program is to conserve and improve California's north coast anadromous salmonid populations by conducting, in cooperation with public and private landowners, systematic multi-scale assessments of watershed conditions to determine factors affecting salmonid production and recommend measures for watershed improvements.

Public Review Draft - March 22, 2002

Table of Contents

EXECUTIVE SUMMARY	5
Introduction.....	5
Salmon, Stream, Watershed, Land-use Context	5
Subbasin Scale	6
Assessment Components	6
Conclusions and Recommendations	7
Estuary.....	8
Estuary Subbasin Issues.....	8
Estuary Subbasin Issue Synthesis.....	9
Northern Subbasin	10
Northern Subbasin Issues	10
Northern Subbasin Issue Synthesis.....	11
Eastern Subbasin	13
Eastern Subbasin Issues.....	13
Eastern Subbasin Issue Synthesis.....	15
Southern Subbasin	16
Southern Subbasin Issues	16
Southern Subbasin Issue Synthesis.....	17
Western Mattole Subbasin.....	18
Western Subbasin Issues	19
Western Subbasin Issue Synthesis.....	21
Next Steps	22
LIST OF FIGURES	23
LIST OF TABLES	25
PROGRAM INTRODUCTION AND OVERVIEW.....	26
Salmon / Stream / Watershed / Land Use Relationships	26
Factors Affecting Anadromous Salmonid Production.....	29
Policies, Acts, and Listings.....	30
